Hospitals and deaths

Number of daily hospital admissions with Covid in England Mar 2022 to 22 May 2023

Data from <https://www.england.nhs.uk/statistics/statistical-work-areas/covid-19-hospital-activity/>

Number of people in hospital with Covid in England by primary reason

Daily Occupied Mechanically Ventilated Beds for England

1 May 2021 – 24 May 2023

(Source: Covid Daily Update)

Thanks to Bob Hawkins for the chart

Number of deaths with Covid on the **death certificate** by week registered in England and Wales July 2021 to 12 May 2023

Data from :

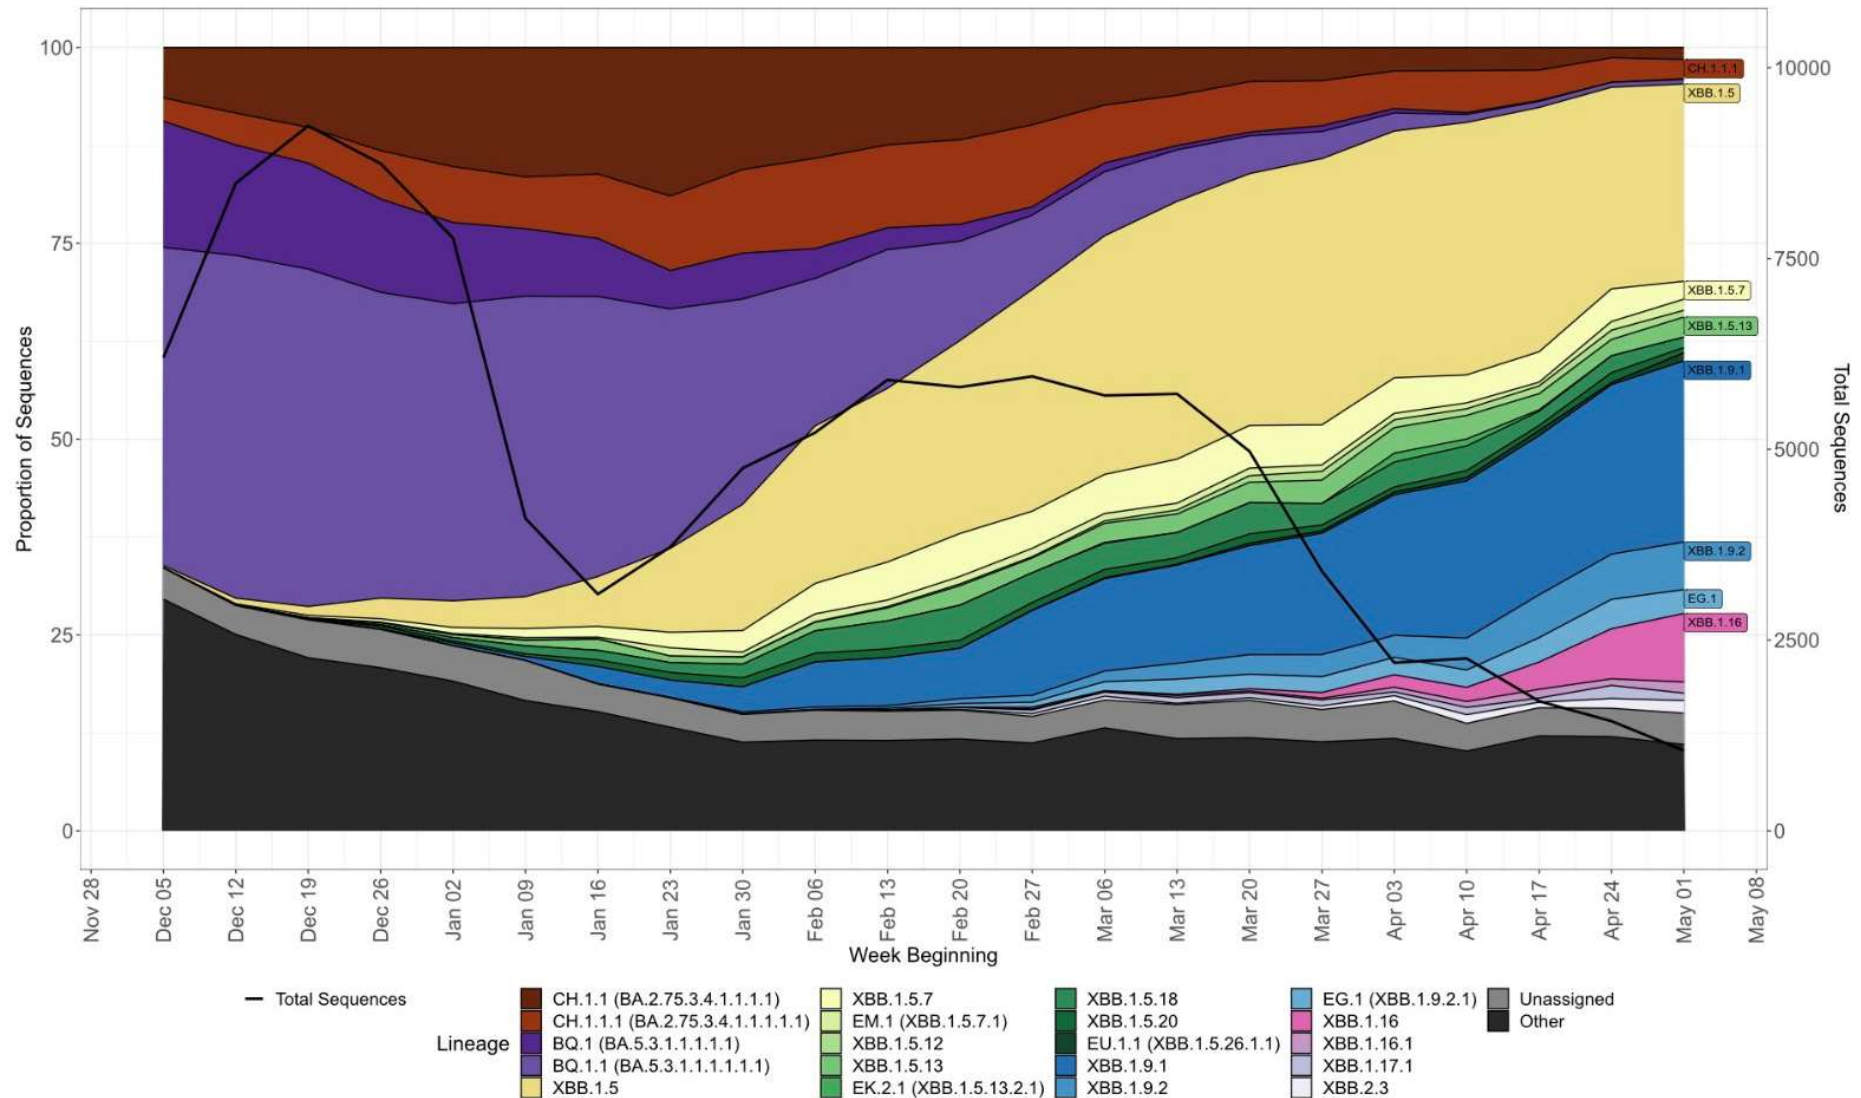

England and Wales: www.ons.gov.uk/peoplepopulationandcommunity/birthsdeathsandmarriages/deaths/bulletins/deathsregisteredweeklyinenglandandwalesprovisional/latest

Variant update
New routine UKHSA report!

Current lineages in the UK: UKHSA variant report to 18 May 2023

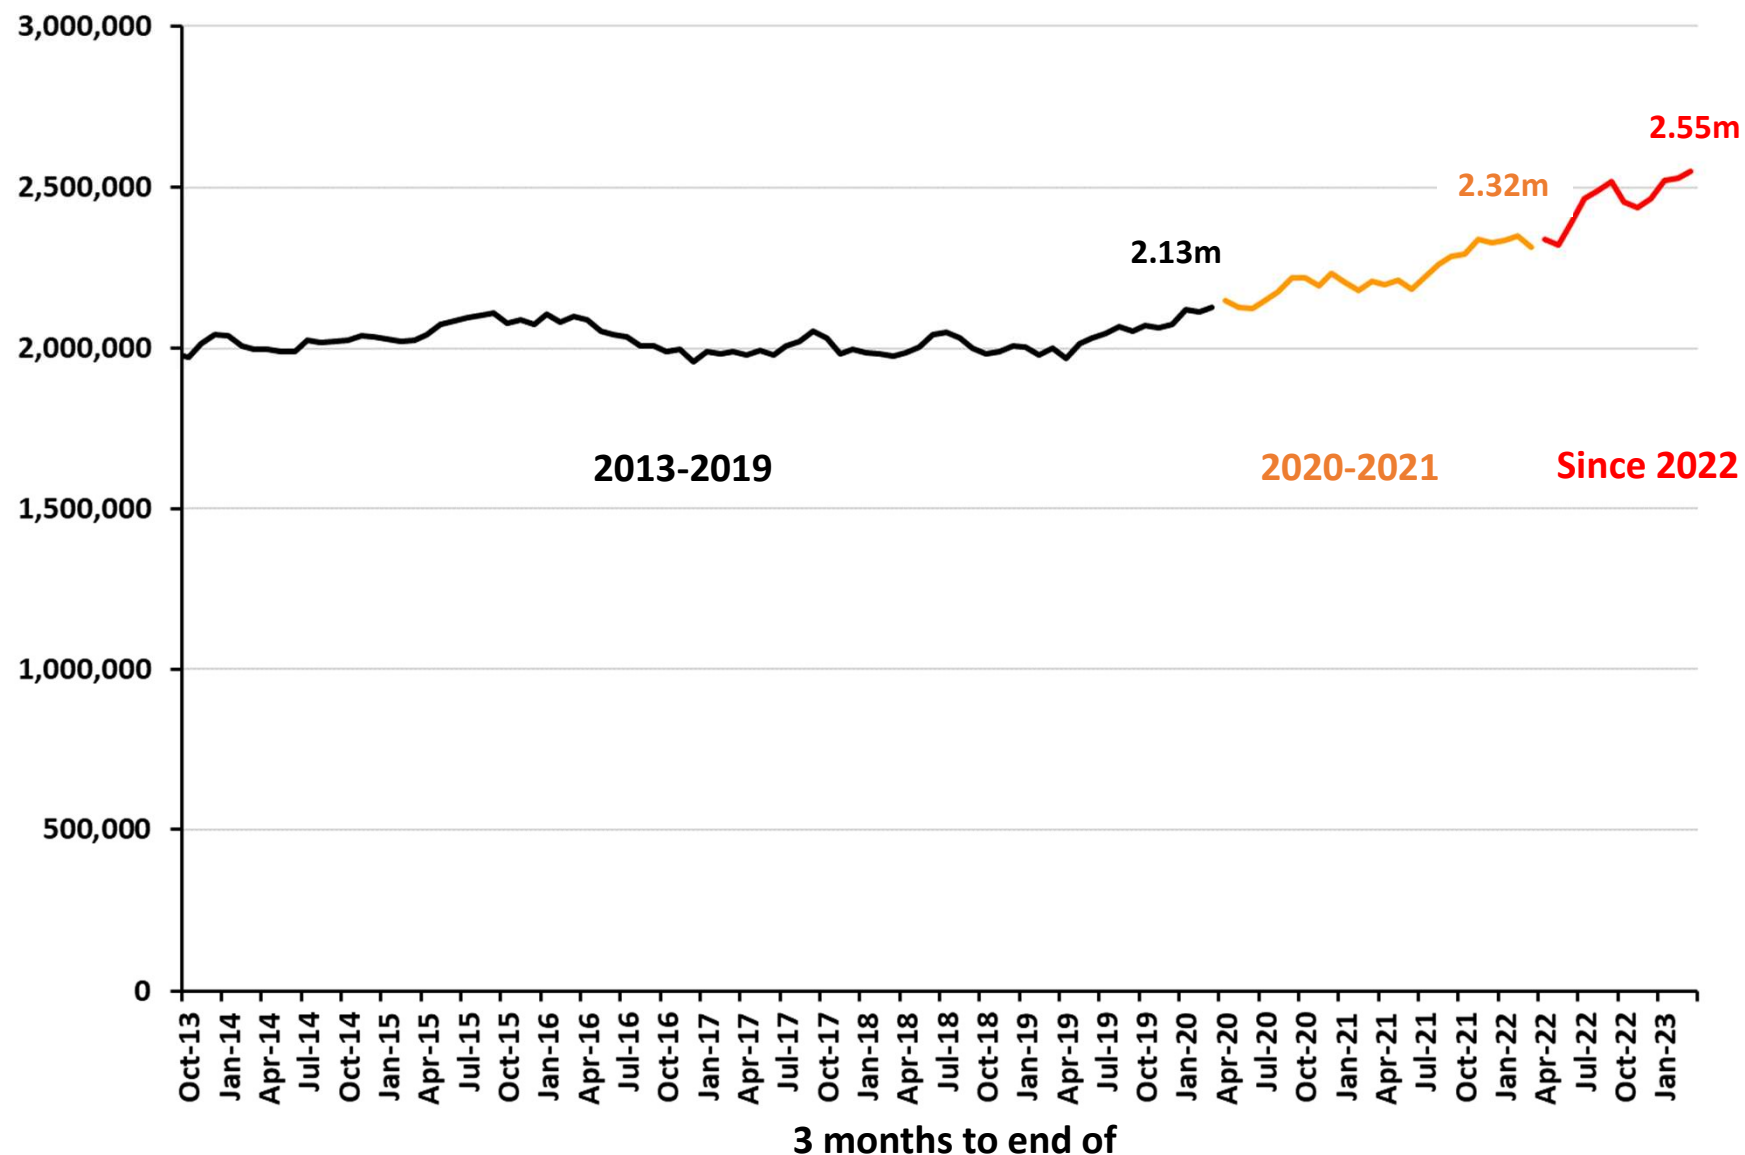

Omicron XBB lineages dominate (>80%).

A few are growing but not fast enough to be massively concerning

Long term sickness

Number of people aged 16-64 in the UK not seeking employment due to long term sickness

Young people

Percent of Year 13 pupils' days schooling missed due to Covid in 2021-2022 Academic Year for England

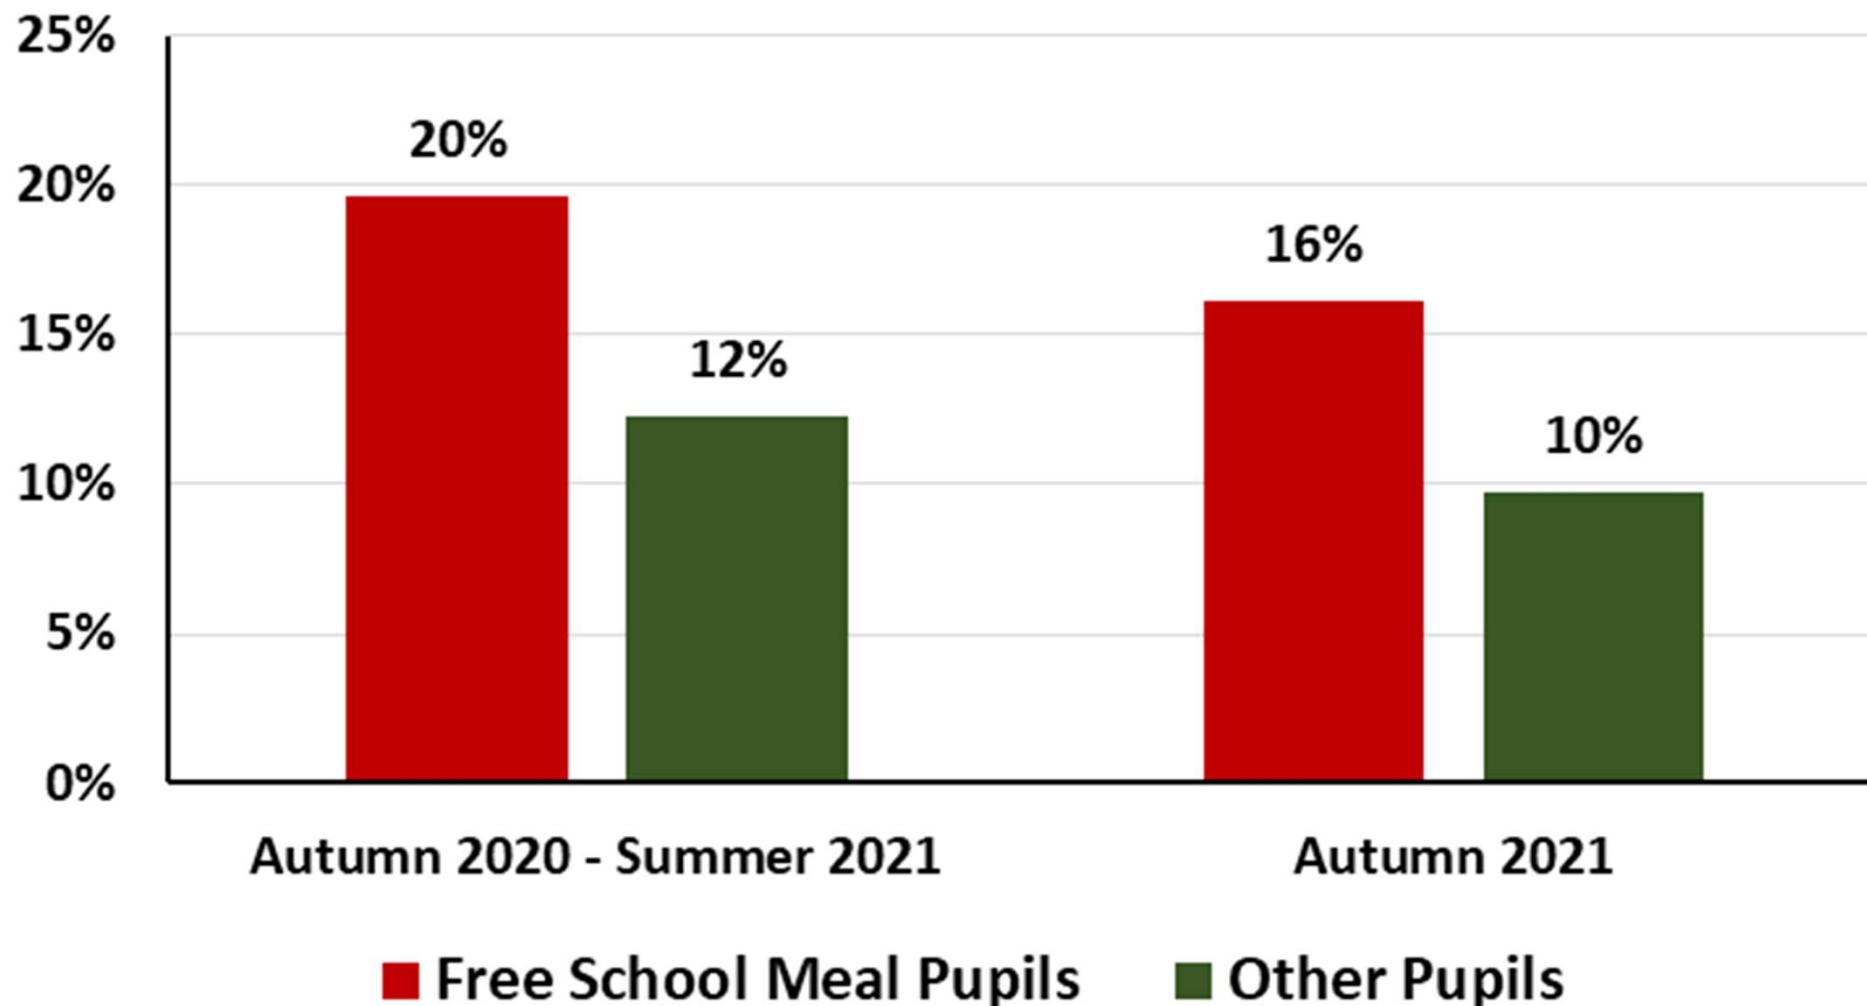

(Source: Sutton Trust report on A levels and University Access 2022 – Aug 2022)

<https://www.suttontrust.com/wp-content/uploads/2022/08/A-Levels-and-University-Access-2022.pdf>

Percent of Missed Sessions for Year 11 Pupils for 2020/21 and Autumn 2021 Terms by Disadvantage Status for England

(Source: Education Data Lab Report on How much in-person teaching have Year 11 Missed– Jan 2022)

<https://ffteducationdatalab.org.uk/2022/01/how-much-in-person-teaching-have-year-11-missed/>

- Spring boosters are underway for the over 75s and immunocompromised – drop off in uptake compared to last time, especially among ethnic minorities
- Hospitalisations and deaths falling – at lower levels now that they’ve been for a long time. “Arcturus” variant still growing, but unlikely to cause a big wave.
- Record number of people aged 18-64 not looking for work due to long term sickness
- The pandemic caught young adults aged 16-24 at a particularly important time of life – transition between school and university/work and transition to adulthood and independent living.
